Ruggli CL-3 Tampon Machine

Ruggli tampon machines have an excellent reputation around the globe. They fulfill specific customer expectations with respect to performance and cost-effectiveness. The newly developed **CL-3** for the production of digital tampons without applicators complies with sophisticated requirements in terms of output and design.

Fleece feeder

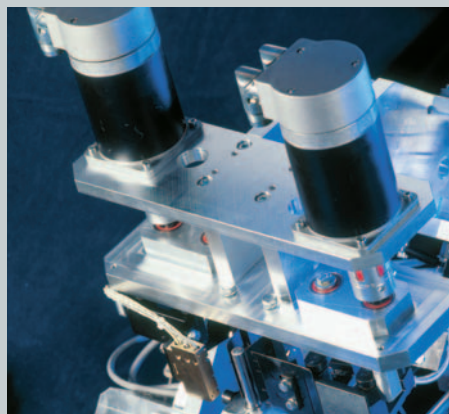

Non woven unit drive

Tampon press

Head forming unit

Cello tube forming unit

Output conveyor

Ruggli CL-3

Output	speed: 120 tampons/min efficiency: up to 90%, in relation to operation personnel and material quality
Dimensions	main unit: LWH: 3600 mm / 1450 mm / 1850 mm
Weight	ca. 4500 kg
Main drive	4 kW, frequency controlled, with disc brake
Electrical power	3 x 400 V AC 50 / 60 Hz, max. 25 A
Secondary voltage	24 V DC and 42 V AC
Compressed air supply	pressure 6 bar, flow ca. 2.7 m ³ /h
