Ruggli TPA Tampon Machine

Ruggli tampon machines have an excellent reputation around the globe. They fulfill all specific customer expectations with respect to manufacturing efficiency and cost-effectiveness. Thanks to continuous development work, the performance and safety of the **TPA** fulfill the highest demands for the production of applicator tampons.

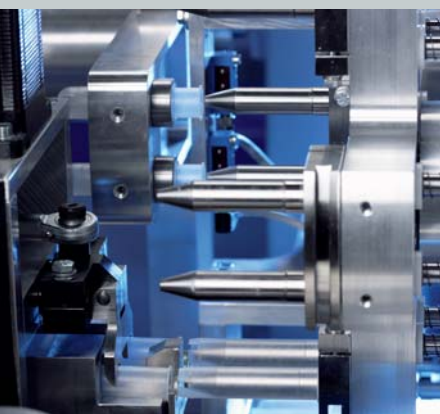

Cams

Fleece conveyer

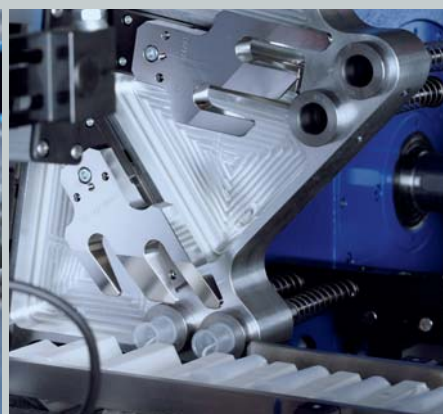

Detail Spiral conveyer

Assembly unit

Positioning unit

Transport drum

Ruggli TPA

Output

speed: 100 tampons/min
efficiency: up to 90%, in relation to operation personnel and material quality

Dimensions

main unit: LWH: 4400 mm / 3200 mm / 1850 mm
assembly unit: LWH: 1500 mm / 900 mm / 1850 mm

Weight

main unit: ca. 4200 kg
assembly unit: ca. 750 kg

Main drive

3 kW, frequency controlled, with disc brake

Electrical power

3 x 400 V AC 50 / 60 Hz, max. 25 A

Secondary voltage

24 V DC / 60 V DC and 46 V AC
